THE GEYSERS
65TH

Calpine's Geothermal Visitor Center in Middletown, California is open to the public, free of charge. Our 6,500 square foot facility promotes geothermal education and serves as a community meeting and event venue. Offering interactive displays depicting the benefits and challenges of geothermal energy, the Calpine Geothermal Visitor Center and our tours share the history and geology of The Geysers, describes geothermal drilling, providing a behind the scene look at our power production technologies and recycled water-to-electricity projects.

Fun, Interactive Displays:

- **History of The Geysers:** Going back 12,000 years, learn more about the area's rich history.

- **Sustainable Energy:** The role of geothermal energy and battery energy storage.

- **Global Context of Geothermal Energy:** How volcanism and plate tectonics are linked to geothermal systems.

- **Drilling and Geology:** What it takes to create a connection between the surface and a geothermal reservoir 8,000 feet below.

- **Geothermal Power:** Key components of a geothermal power plant.

- **Water and Reinjection:** An overview of the innovative recycled water projects, transporting millions of gallons of recycled water daily from local communities to The Geysers.

- **Next Generation Geothermal:** Learn more about new energy technology and continued energy production at The Geysers.

- **Induced Seismicity:** Real-time and historic seismic data.

- **Interactive Topographic Model:** Displays the location of production and injection wells, power plants and steam and injection pipelines and much more.
